- **Instead of conclusions....**

It takes a school (664 students, 52 teachers) that closes during the coronavirus pandemic.

It cleanses itself of volatility, uncertainty, complexity and ambiguity.

It is organized every day during ONLINE SCHOOL with vision, understanding, clarity and agility in formal and informal meetings (lessons, teacher councils, training courses, meetings of methodical commissions, meetings with various working groups, meetings with parents)

Weigh the ingredients well, mix after simplified procedures and new routines and prepare the dough from: a part work and learning, a part peace and relaxation.

It adds 3 tablespoons of optimism, one tablespoon of flexibility, a good grip of cooperation and ... a drop of hope.

Communication and connection from various devices are then poured over the dough thus obtained.

The ready-made preparation is seasoned with self-confidence, resilience and autonomy.

It is served daily, with well-being, alone or together with the students, colleagues and parents of the school. It improves based on the feedback received.

This recipe is not compensated, it is free and is transmitted freely, accompanied by the message: **EVERYTHING WILL BE GOOD!**
